Taxable Sales In California (Sales & Use Tax)

2012 Second Quarter

Taxable Sales in California is a quarterly report on retail sales activity in California, as measured by transactions subject to sales and use tax. The report includes data about statewide taxable sales by type of business as well as data about taxable sales in all California cities and counties.

The following factors should be considered when using these data:

- 1. Total taxable transactions do not necessarily indicate the gross sales of stores dealing in taxable items. Only sales subject to sales or use tax are tabulated; excluded are sales for resale, sales of nontaxable items such as food for home consumption and prescription medicines, and taxable sales disclosed by Board audits.
- 2. Some businesses dealing primarily in nontaxable activities, such as services, manufacturing, contracting, or wholesaling, either sell some merchandise that is subject to sales tax or use some items that were purchased ex-tax and on which use tax must be paid. Such transactions are included in the tabulations.
- 3. Data are compiled by type of store but cannot be broken down by commodity.
- 4. Businesses are classified according to their principal line of merchandise or service.

TAXABLE SALES IN CALIFORNIA

SECOND QUARTER 2012

California taxable sales continued to grow in the second quarter of 2012, rising 7.2 percent over the second quarter of 2011. This was the slowest growth since the first quarter of 2011. Second quarter 2012 taxable sales totaled \$139.3 billion, \$9.4 billion more than taxable sales in the second quarter of 2011. Taxable sales increased at a growth rate 4.0 percent faster than California personal income in the second quarter.

In constant dollar terms, second quarter 2012 taxable sales grew at 6.2 percent. The California Taxable Sales Deflator, which measures the rate of change of all taxable sales in the state, was up 1.0 percent over the same quarter last year. The California Consumer Price Index, which measures price changes of both taxable goods and nontaxable goods and services, grew at a faster rate of 1.8 percent.

Taxable sales made by Retail Stores and Food Services grew at 7.4 percent, accounting for 68.1 percent of total taxable sales in the

second quarter of 2012. Nonretail Outlets (all other outlets) grew at 6.9 percent, and comprised the remaining 31.9 percent. Nonretail taxable sales include items such as business equipment and construction materials.

Taxable sales made by Motor Vehicles Dealers rose faster than any other major type of retailer at 18.3 percent, mostly due to sales at New Car Dealers, followed by Other Motor Vehicle Dealers. Lower gasoline prices held back taxable sales at Gasoline Stations to a 2.8 percent growth rate, one of the lowest quarters for this sector in the last couple of years.

Clothing stores had one of the highest growth rates for this quarter, growing 11.1 percent over the same quarter last year. Other sectors with strong showings this quarter were Food Services (8.2 percent growth) and Home Furnishings (8.0 percent growth).

[#] Sales omitted because their publication would result in the disclosure of confidential information. In Table 6, these are included with "Total Outlets, Taxable Transactions".

FOOTNOTES

Notes concerning permits:

A sales tax permit is required for each place of business operated by all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in nontaxable commodities. Permits are tabulated twice a year: as of January 1 and July 1.

a/ Per capita taxable sales were derived by dividing second quarter self-assessed taxable sales by the population estimates of the State Department of Finance for July 1. The populations used were 37,570,307 for 2011 and 37,826,160 for 2012.

b/ Some permittees, by the nature of their business, are not required to allocate local sales or use tax to specific local jurisdictions. Their taxable transactions are listed under the column headed "Unallocated" in Table 2. Contractors and manufacturers generate most of the countywide unallocable transactions through construction work and making installations of manufactured products in the various counties. Unallocated taxable sales are not reported in Tables 5 and 6.
